Anodised aluminium

The finishes shown are purely indicative. Suitable for coastal areas.

Materials

- EN-AC-51100 AG3 cast aluminium structure with anodised finish.
- Seat and back made of 90 x 30 mm slats of heat-treated European pine wood, with 100% PEFC certification, or tropical wood, with FSC 100% certification, with a single coat of oil protection, or 6063-T5 extruded aluminium, with an anodised finish.
- Zinc-plated steel bolts.
- A2 stainless steel hardware.

Installation and maintenance

- Installed with two bolts per support structure, inserted in holes made in the pavement beforehand, and filled in with epoxy resin, quick-setting cement or similar.
- The element is delivered as two separate components: the structure and the slats.
- Installation and assembly instructions, hardware and fixing bolts or studs included.
- Does not require any maintenance, except to preserve the original colour of the wood.
